Publications

2018 **Detecting Anomalous Faces with "No Peeking" Autoencoders,**
A. Bhattad, J. Rock, D. A. Forsyth Submitted to NIPS'18 [arXiv] [poster]

- Designed a novel feature learning approach for anomaly detection using inpainting auto-encoders.
- Built a dataset of real anomalous faces and real typical faces to evaluate the proposed framework.
- Demonstrated that our constructed feature works well in both supervised and unsupervised applications.

2018 **Quantitative Evaluation of Style Transfer,** M. Yeh, S. Tang,
A. Bhattad, D. A. Forsyth Submitted to ECCV'18 [arXiv] [poster]

- Developed a quantitative evaluation protocol to compare different style transfer methods using an effectiveness and coherence metric
- Proposed an improved style transfer using a controlled cross layer gram matrices
